ASSIGNMENT 2 REPORT

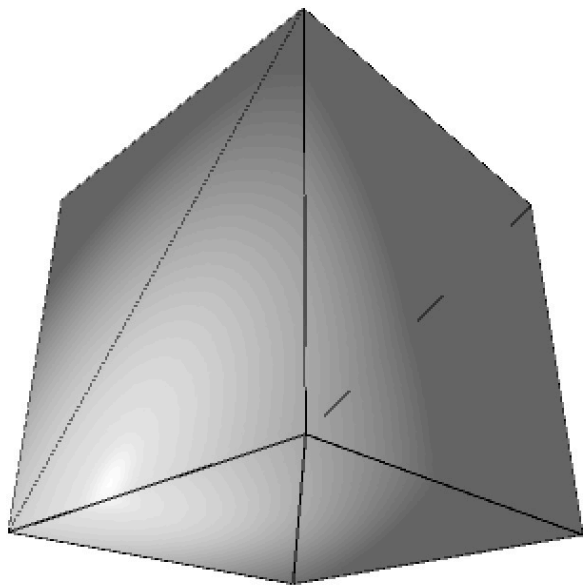

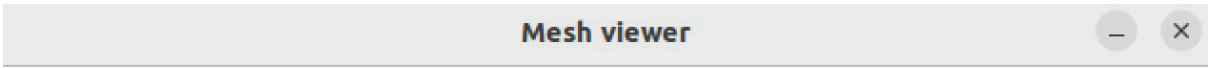

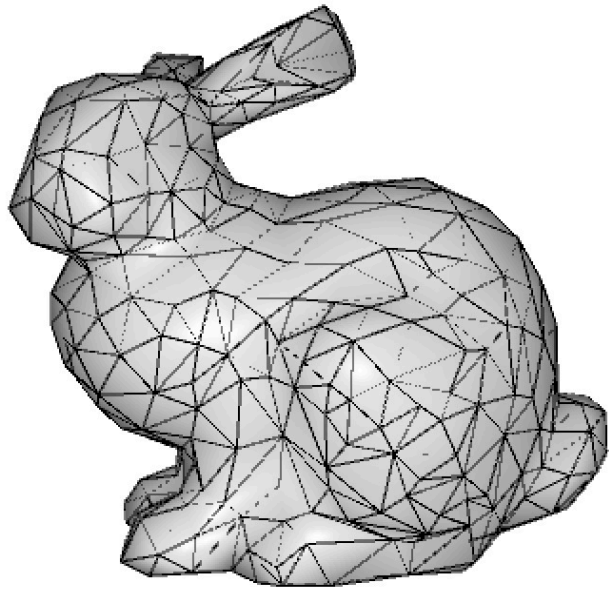

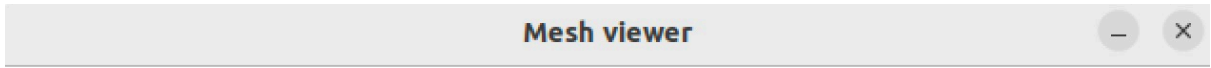

Siddhesh Kalekar - 2019CS50436

Paras Sharma - 2019PH10644

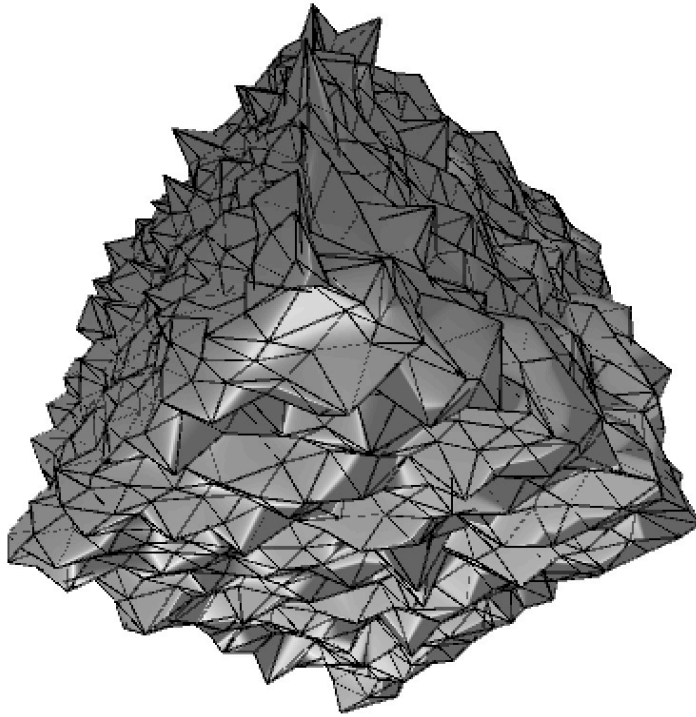

- The file to run different programs for Part 1 is stored in "src/part1.cpp"
- There are different functions which perform different tasks as mentioned in part 1 of the problem. Just uncomment the code function for specific task.
- The screenshots are attached for different cases.

- We were not able to finish the second part due to time constraints.
- But we could implement the 2.1 problem in a similar as we implemented the normals calculation for each vertex in our code.
